SIDAK RANA

Stony Brook, NY | 516.734.1888 | ranasidak@gmail.com | sidak-rana.github.io | github.com/Sidak-Rana | linkedin.com/in/srana907

EDUCATION

Stony Brook University — College of Engineering and Applied Sciences Stony Brook, NY
Bachelor of Science in Computer Science (intended), Minor in Finance (intended) *Aug 2025 – May 2029*
Cumulative GPA: 3.34/4.00 | Dean's List: Fall 2025, Spring 2026
Relevant Coursework: Data Structures, Discrete Mathematics, Probability & Statistics, Linear Algebra, Object-Oriented Programming (AP credit)

TECHNICAL PROJECTS

Stock Portfolio Dashboard — Solo Developer June 2026
Python, Streamlit, Pandas, Plotly, yfinance API *github.com/Sidak-Rana/Stock-Portfolio-Dashboard*
- Architected a two-module application separating the data layer from the Streamlit presentation layer, computing real-time gain/loss, percent return, and total value across all holdings
- Engineered a three-tier price-resolution fallback so the dashboard degrades gracefully and stays usable when the yfinance API returns partial or missing data
- Built three interactive views — Table, Returns, and Distribution — with Plotly: sector allocation, gradient performance bars, one-year returns, and a correlation heatmap
- Set up continuous deployment from the Git-versioned GitHub repository to Streamlit Cloud — each push to the tracked branch rebuilds and redeploys the live app with no manual release step

Microcontroller Digital Clock — ESE 123 Lab Jan – Apr 2026
C, AVR Assembly, ATmega4809, circuit assembly and soldering
- Soldered and assembled the circuit board, then programmed a working digital clock in C implementing 24-to-12-hour conversion and a continuous seven-segment display refresh loop
- Diagnosed and fixed a set-minutes input loop that was being skipped whenever a button was held down, resolving it with a button-release wait before advancing state

Python Stock Report Generator — Co-Developer Jan – Nov 2024
Python
- Co-developed a tool that pulls historical OHLCV data for a user-supplied ticker and auto-generates a PDF report with a price table, color-coded price chart, and recent news headlines

EXPERIENCE

Children's Hope India — Team Leader (promoted from Business Outreach Coordinator) Mar 2023 – July 2025
- Led fundraising initiatives that grew event revenue by over 50%, from $800 to more than $1,200, and coordinated charity events for 100+ participants

Macy's — Sales Generalist Nov 2025 – Apr 2026
- Assisted 50+ customers per shift and processed POS transactions accurately in a high-volume retail environment

LEADERSHIP

Brook Bhangra, Stony Brook University — Secretary July 2026 – Present
- Core organizer of Brook Naal Bhangra 2027, the university's inaugural intercollegiate bhangra competition — a two-day event hosting eight competing teams plus exhibition acts; own records and scoring
- Built the Google Forms and Sheets workflow handling team applications, video verification, and e-board task tracking; primary point of contact for administrators and vendors on a 10-member team

South Asian Student Association, Stony Brook University — Cabinet Member Aug 2026 – Present
- Support the executive board in planning and running events, overseeing on-site execution to keep programming on schedule
- Checked in 45 of 100+ attendees at Mujhe Dosti Karoge and boosted engagement by drawing unpartnered guests into conversation and event games

South Asian Student Association — Liaison, Sholay 2026 Mar 2026 – Apr 2026
- Coordinated logistics for a 14-member competitive team, serving as point of contact between members and organizers

SKILLS, CERTIFICATIONS, AND LANGUAGES

Technical: Python, Java, C, JavaScript, HTML/CSS | Pandas, NumPy, Plotly, Streamlit | Git, GitHub, VS Code, Arduino IDE, Streamlit Cloud, soldering
Certifications: Google AI Professional Certificate — Google (July 2026) | Cybersecurity Job Simulation — Mastercard (June 2024)
Languages: English, Punjabi (native) | Spanish (professional) | Hindi (limited) **Organizations:** Sikh Student Association, AI Computing Society
